REMARKS

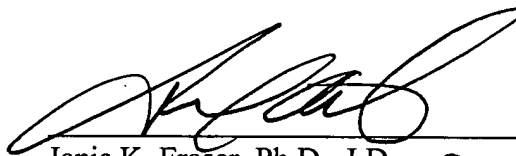

The amendments to pages 9, 14, 17, 24, 40, and 46 of the specification clarify translated text, delete an inappropriate description, and correct typographical errors in the original Japanese specification, which are apparent when read in the context of the entire specification. The amendments also add a cross-reference to related applications and insert into the specification a paper copy of the sequence listing, in which the general information has been updated to reflect accurate information for the instant application.
